

Texas *Girls* Collaborative Project

The TxGCP connects organizations and individuals across Texas committed to informing and motivating girls to pursue careers in science, technology, engineering and mathematics (STEM).

Connections

Connecting organizations, educators, administrators, leaders and individuals across Texas committed to informing and motivating girls to pursue careers in science, technology, engineering and mathematics (STEM). Regional forums, conference workshops and presentations, and Google Groups provide online and in-person opportunities for networking, collaboration, and information sharing for those engaged in STEM outreach.

Resources

Supporting resources such as Texas STEM Connections to connect STEM professionals and volunteers to educators and organizations and students seeking STEM volunteers for their classrooms and programs. (www.texasstemconnections.org)

Best Practices

Sharing and disseminating research-based STEM K-12 outreach, effective messaging and program assessment best practices. Disseminating PBS SciGirls curriculum, TechBridge Role Models Matter curriculum, effective strategies to engage girls in STEM, Resourcefulness energy curriculum, WaterBotics underwater LEGO robotics camp curriculum, and other STEM resources across Texas.
